RECORD OF CHANGES

Nature of Change	Date of Change	Page(s) Affected	Changes Made by (Please Print):	Initials
Task Force changed to Coalition	11/16/16	p.6	Ellen Cornelius	EC
Updated Unified Resource Listing to include current POCs	11/16/16	p. 21-57	Ellen Cornelius	EC
Unified Resource Listing sorted by Asset	11/16/16	p. 21-57	Ellen Cornelius	EC
Added BioQuell to Unified Resource Listing	11/16/16	p.23	Ellen Cornelius	EC
Added Active Assailant Kits to Unified Resource Listing	11/16/16	p.23	Ellen Cornelius	EC
Updated Resource Detail Information Sheets to include current POCs	11/16/16	p. 58-164	Ellen Cornelius	EC
Added Resource Detail Information Sheet for Active Assailant Kits	11/16/16	p. 161-162	Ellen Cornelius	EC
Added Resource Detail Information Sheet for BioQuell	11/16/16	p. 163-164	Ellen Cornelius	EC
Replaced ACS Itemized Master List with current list	11/16/16	p. 165-194	Ellen Cornelius	EC
Updated Non-Deployable Assets/On-going Projects	11/16/16	p.195-204	Ellen Cornelius	EC
Updated Attachment B: Region III Vehicle Fleet	11/16/16	p. 230-237	Ellen Cornelius	EC
Updated Appendix D: Region III Resource Management Directory	11/16/16	p. 241-250	Ellen Cornelius	EC
Updated Appendix E: DHMH State Facilities Emergency Contacts List	11/16/16	p. 251-253	Ellen Cornelius	EC
Updated Appendix G: Terms and Acronyms	11/16/16	p. 256-257	Ellen Cornelius	EC
Updated Appendix K: Ham Radio Location Survey	11/16/16	p. 277	Ellen Cornelius	EC
Updated Appendix L: Moulage Trained Personnel	11/16/16	p. 278	Ellen Cornelius	EC
Updated Appendix N: Directory of Region III Resource Management Plan-Related Plans, Policies & Protocols	11/16/16	p. 294	Ellen Cornelius	EC

ACKNOWLEDGEMENTS

This plan was developed, in large part, as a direct result of the hard work and contributions of Medstar Health (Christina Hughes and Loreal Froat) and Lifebridge Health (Beth Neilson). Without their constant efforts over the entire length of the project, this plan would not have been possible.

Special thanks also goes out to each of the plan reviewers, contributors, and supporting agencies (particularly Department of Health and Mental Hygiene (DHMH) and the Baltimore Urban Area Security Initiative (UASI)) who so graciously supplied information, provided feedback, or answered questions.

RESOURCE MANAGEMENT PLAN

I. Introduction

In 2006, the Region III[1] Health & Medical Task Force (Task Force) was created in order to ease regional collaboration between local and state government agencies and regional healthcare facilities in the area of emergency preparedness and response. Since that time, the Task Force became a group with an ongoing mission. As a result, the Task Force became the Maryland Region III Health & Medical Coalition[2] (Coalition). As a group that continues to move forward, the Coalition has collectively utilized funding to purchase equipment and supplies for the benefit of the region. These purchases were made through funding from both the Baltimore UASI grant, as well as the Hospital Preparedness Program (HPP).

Resource allocation, tracking and deployment are essential elements of effective emergency preparedness. As such, the Region III H&MTF contracted with the University of Maryland Center for Health and Homeland Security (CHHS) to develop a regional resource management plan (RMP). This plan aims to incorporate the following elements:

- Identifying and locating available regional supplies and equipment using capabilities available within Region III;
- Requesting, approving, and deploying regionally maintained equipment caches as identified by the regional partners utilizing a common process for requesting asset deployment;
- Identifying persons or entities responsible for tracking, maintaining, and restocking equipment and materials during the times of peace and disaster; and
- Addressing the responsibilities of facilities receiving equipment and materials from the Region III resource caches.

Additionally, the plan will summarize the operational elements of each regional resource to allow for rapid requests and deployment during emergency responses and identify the triggers that will initiate regional resource availability. The RMP will optimize efficiency by utilizing

[1] Region III is based on the subdivision of Maryland developed and utilized by the Maryland Institute of Emergency Medical Services Systems (MIEMSS) and includes Harford, Carroll, Baltimore, Anne Arundel, and Howard counties, as well as Annapolis and Baltimore cities.

[2] See Appendix D – Region III Resource Management Directory, which includes the Coalition members and their contact information.

capabilities already present within Region III while delineating the appropriate vertical and horizontal communication pathways for equipment mobilization.

II. Governing Policies

This section aims to summarize the existing policies, regulations and agreements that affect resource management, disposition and utilization. For the purposes of this plan, the same regulations covering procurement and purchase are not addressed.

a. Guiding Principles

There are several layers of existing policy that relate to and drive process around regional resource allocation and other interactions between healthcare partners in Region III. This RMP operates under the following basic assumptions:

- All organizations, agencies and partners will operate according to the adopted authorities and regulations for their respective institutions;
- The RMP is not intended to nor should it supplant any existing state or local policies, procedures, or laws governing appropriate and necessary actions during an emergency response;
- The regional healthcare partners have entered into a Memorandum of Understanding (MOU), the Baltimore City Healthcare Facilities Mutual Aid system MOU, that defines the roles and responsibilities around their cooperation in emergency preparedness and response;
- Federal law, including sections 44 & 45 of the Code of Federal Regulations (CFR), establishes regulations and requirements around the use of federal funding to procure, allocate and utilize resources; and
- Prior to requesting regional assistance, any singular organization must exhaust its internal means or provide sufficient rationale as to suggest that their internal resources will be insufficient to manage an incident PRIOR to requesting assets through regional partners, their local jurisdictions, or the state of Maryland.

b. All-Source Resource Rules and Regulations

When equipment/supplies that were purchased with funds from the federal government are concerned, the applicable sections of the CFR still apply. In particular, facilities must continue to adhere to the following policies, though this list is not exhaustive:

i. General

- The grantee shall not use the equipment to provide services to non-federal organizations for a fee less than private companies charge for equivalent services, unless specifically authorized by federal statute.
- If the equipment is owned by the federal government, use on other activities not sponsored by the federal government shall be permissible if authorized by the Department of Health and Human Services (HHS) or the Department of Homeland Security (DHS) awarding agency.
- The grantee shall use the equipment in the project or program for which it was acquired as long as needed, and when no longer needed the recipient shall use the equipment in connection with its other federally-sponsored activities.
- The grantee shall make the equipment available for use on other projects or programs if such other use will not interfere with the work on the program, project, or activity for which the equipment was originally acquired.

ii. Equipment Management

- Equipment records shall be maintained accurately consisting of the pertinent information listed in 45 CFR 74.34.
- Equipment owned by the federal government shall be identified as such.
- The grantee shall take a physical inventory of equipment and the results reconciled with the equipment records at least once every two years.
- The grantee shall maintain a control system to insure adequate safeguards to prevent loss, damage, or theft of the equipment.
- The grantee shall implement adequate maintenance procedures to keep the equipment in good condition.

- All grantees shall establish written procurement procedures.
- The grantee shall maintain a contract administration system to ensure performance with the terms, conditions, and specifications of their contracts or purchase orders.
- The grantee shall maintain a written code of standards of conduct.
- The grantee shall provide for a review of proposed procurements to avoid purchasing unnecessary items.
- The grantee shall maintain records sufficient to detail the significant history of procurement for at least three (3) years after disposal.
- The grantee will have procedures in place to handle and resolve disputes relating to their procurements and shall in all instances disclose information regarding the protest to the awarding agency.
- The recipient shall take a physical inventory of equipment and the results reconciled with the equipment records at least once every two (2) years.

iii. Equipment Disposition

- When original or replacement equipment acquired under a grant or subgrant is no longer needed for the original project or program or for other activities currently or previously supported by a federal agency, disposition of the equipment will be made as follows:

    i. Items of equipment with a current per-unit fair market value of less than $5,000 may be retained, sold or otherwise disposed of with no further obligation to the awarding agency.

    ii. Items of equipment with a current per unit fair market value in excess of $5,000 may be retained or sold, and the awarding agency shall have a right to an amount calculated by multiplying the current market value or proceeds from sale by the awarding agency's share of the equipment.

    iii. In cases where a grantee or subgrantee fails to take appropriate disposition actions, the awarding agency may direct the grantee or subgrantee to take excess and disposition actions.

iv. Supplies

- If there is a residual inventory of unused supplies exceeding $5,000 in total aggregate value upon termination or completion of a project or program and the supplies are not needed for any other federally-sponsored project or program, the recipient shall retain the supplies for use on non-federally sponsored activities or sell them, but shall, in either case, compensate the federal government for its share.
- The recipient shall not use supplies acquired with federal funds to provide services to non-federal organizations for a fee that is less than private companies charge for equivalent services, unless specifically authorized by federal statute as long as the federal government retains an interest in the supplies.
- If the supplies are owned by the federal government, use on other activities not sponsored by the federal government shall be permissible if authorized by the HHS awarding agency.
- User charges shall be treated as program income, in keeping with the provisions of Sec. 74.24.

c. <u>Hospital Preparedness Program Resources</u>

In addition to the All-Source Resource Rules and Regulations, resources purchased with funding made available through the HPP must follow the following regulations:

- The DHMH/HPP guidelines must be adhered to with regards to expenditures/purchases.
- The grantee will perform activities that coordinate, integrate, prioritize, and sustain improvements in healthcare preparedness.
- The materials shall be used in the event of a hospital emergency or public health event.
- The grantee agrees to maintain all 14 NIMS Elements and self-authorize compliance.

- The grantee agrees to demonstrate successful completion and/or proof of Fatality Management Planning and Hospital Evacuation Planning.
- The grantee shall not use HPP funds to:
    - Make payments directly to recipients of services, except for reimbursement reasonable and allowable out-of-pocket expenses associated with consumer participation in State or consortia activities.
    - Support legal services.
    - Provide direct maintenance expenses of privately owned vehicles or any other costs associated with a vehicle.
    - Purchase or improve land or any building, other than minor remodeling.
- The grantee shall comply with all DHMH and Assistant Secretary for Preparedness and Response (ASPR) fiscal requirements for timely submission of detailed budgets, budget modifications, and not less than bi-annual expenditure projections on the required DHMH forms.
- The grantee shall return any unused funds to DHMH and provide necessary documentation.
- Equipment with HPP funds may be recalled or requested to support local, regional, or statewide emergency response efforts and must be catalogued for future reference and review.

III. Situation

a. Emergency/Disaster Conditions and Hazards

A disaster is defined as an overwhelming incident that exceeds the effective response capability of the impacted healthcare facility's or facilities' resources. These disasters can have a wide ranging impact on local resources depending on the type and size of the disaster. The affects are also largely dependent on the size and capability of the impacted facility. Because these affects could happen immediately, it is imperative that prompt identification, procurement, and allocation of resources, which are necessary to ensure an appropriate and effective response, occurs. It is also important to note that a severe emergency may limit access to the resource infrastructure. The disaster may be external or internal for healthcare facilities, and an assumption is that each affected facility's emergency management plans have been implemented.

b. Planning Assumptions

- Each organization has an established system for managing their resources.
- All responding resources will be used under the Incident Command System (ICS) or Hospital Incident Management System (HICS).
- The type of the emergencies for which this plan will be activated will overwhelm local mutual aid capabilities.
- Standard communication forms may be interrupted, especially during the initial phases of the emergency response.
- Transportation to affected areas may be impeded due to damaged roads, bridges, or various means of transportation.
- This plan addressed shared resources between regional partners and does not include management issues that may surround requesting or utilizing resources from a state or federal level.
- Resource inventories will vary, and maintaining current resource lists will be most effectively managed at the city, agency, and organizational levels first.
- Donating facilities may charge a "standardized rate" or "contractor force rate" for resources and services provided, or they may charge the actual cost of providing the resource or service.

- No party shall assume liability for any injury (including death) to any persons, any damage to any property or other claims arising out of the acts or omissions of any other party or parties or any of such other party's or parties' agents or employees.
- This plan is in effect until both the Donor Facility and the Impacted Healthcare Facility agree to discontinue the assistance request.
- This plan supplements each facility's disaster plan or MOUs between healthcare systems, rather than replaces or supersedes them.
- By signing this plan, each facility is stating its intent to undertake a reasonable effort to comply with the terms described herein.

IV. Concept of Operations

a. General

The Concept of Operations (CONOPS) section is intended to provide the operational details of regional resource management, maintenance, record-keeping, requests, and reimbursement. This CONOPS is not intended to supersede, negate, or otherwise interfere with any existing federal or state regulations.

b. Resource Management & Tracking

i. Resource Tracking (Pre-Event)

- The Maintaining Facility/Organization (MFO) is responsible for resource tracking the assets that they manage, store and maintain during periods of non-activation.
- The MFO produce annually an Annual Resource Tracking Report (Appendix A-2), starting within 1 year of resource procurement, to the primary grantee under which the equipment was purchased (if other than the MFO).
- Annual Resource Tracking Reports shall include:
    - The resource's current location;
    - The point of contact;
    - Any special considerations for storage (i.e., refrigeration);
    - Maintenance records for the asset; and
    - Any Resource Accounting Records (HICS 257) provided by the Requesting Facility/Organization (RFO).

ii. Resource Tracking (Response)

- The RFO is responsible for resource tracking from the period of time it receives an asset until it is returned to the MFO.
- At the time of receiving the asset, the RFO will provide the point of contact for the received asset to the MFO.
- Within two (2) weeks of returning a regional asset to an MFO, the RFO will provide all relevant HICS 257 forms related to the resource(s) and

an Asset Utilization Report (Appendix A-3) that includes a summary of:

- Hours of usage for equipment;
- Number utilized for a supply;
- Any maintenance completed on the device; and
- Any damage incurred by utilization.

iii. *Resource Status Reporting*

- Whenever the disposition of equipment or supplies changes, the MFO is responsible for promptly notifying regional partners through the Facilities Resources Emergency Database (FRED).
- Changes in disposition can include, but are not limited to:
  - Expiration of supplies;
  - Repairs of equipment that exceed one (1) week;
  - Deployment; or
  - Equipment awaiting service or supplies requiring restock following deployments.

iv. *Resource Maintenance (Pre-Event)*

- The MFO is responsible for providing day-to-day maintenance, security, and care for equipment and supplies located at their respective facilities.
- The MFO will ensure compliance with all local, state, and federal regulations pursuant to grant-purchased equipment and supplies as noted in the Code of Federal Regulations (principally 44 & 45 CFR) and as summarized in *Section II: Governing Policies* of this RMP.
- The MFO will ensure that all manufacturer requirements pursuant to safe and effective storage of supplies and equipment are met. This may include, but is not limited to:
  - Temperature;
  - Humidity;
  - Prevention of improper handling; and

    - Theft prevention.
- While resources are intended for emergency use only in most cases, if good maintenance practice stipulates usage of equipment, the MFO is permitted to cycle surge equipment into their normal cadre of equipment to maintain calibration. In doing so, a static unit must be removed from circulation to maintain the surge capacity intended by the equipment purchase.
- The MFO shall make available to approved, requesting partners all regional assets 24 hours a day, 7 days a week, and 365 days a year. To that end, the MFO is responsible for providing and updating redundant, all hours points of contact for each regional resource under their control.

c. *Resource Maintenance (Response)*

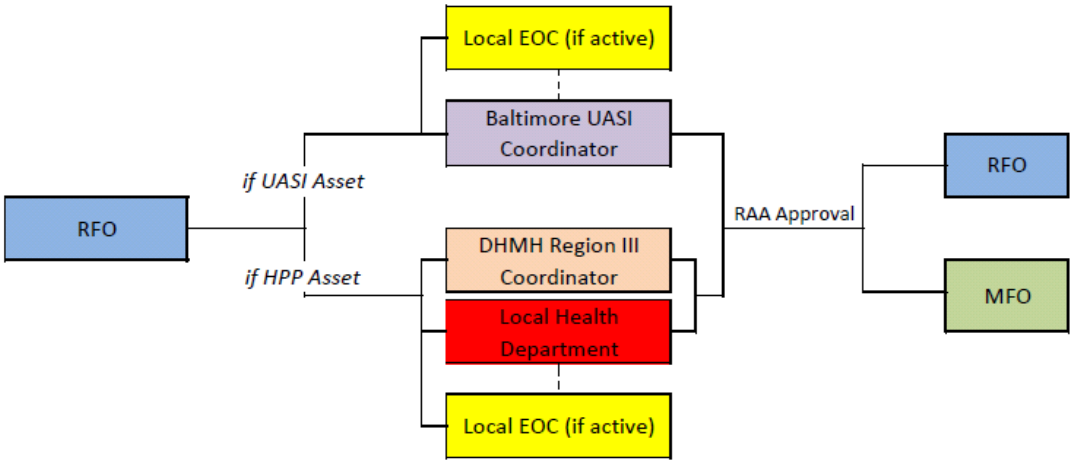
- During an active deployment, the RFO is responsible for providing maintenance, security, and care for equipment and supplies being utilized at their respective facilities.
- The RFO will ensure compliance with all local, state, and federal regulations pursuant to grant-purchased equipment and supplies as noted in the Code of Federal Regulations (principally 44 & 45 CFR) and as summarized in *Section II: Governing Policies* of this RMP while resource are deployed within their respective facilities.
- The RFO will ensure that all manufacturer recommendations and reasonable accommodations pursuant to safe and effective storage of supplies and equipment are met during deployment. This may include, but is not limited to:
    - Temperature;
    - Humidity;
    - Prevention of improper handling; and
    - Theft prevention.

d. <u>Procedures for Deployment</u>

i. Resource Request

- Only the Emergency Incident Commander/designee at each RFO has the authority to initiate the transfer or receipt of resources.
- The onsite Incident Commander must first identify the funding stream under which an asset was purchased (UASI or HPP) and the MFO for the asset to be requested by consulting the Unified Resource Listing (Section V.a) and/or the Resource Information Sheets (Section V.b).
- When supplies or equipment are needed, the initial request for transfer may be verbal to allow the MFO appropriate time to ensure access to equipment. However, a verbal request must be followed-up with a formal Regional Resource Request Form (R3 Form – Appendix A-1) submitted prior to final transfer of the assets from the MFO to the RFO.
- Once the grant funding stream under which an asset was purchased is identified, requests are made to the following:
    - For HPP Assets:
        - Local Health Department
        - DHMH Region III Coordinator
    - For UASI Assets:
        - Baltimore UASI coordinator or his/her representative
- The RFO should also notify their local Emergency Operations Center (EOC), if activated, of any external requests for assets through either the HPP or UASI processes. The local EOCs will communicate with request recipients to assist in validating and processing the request through to the Request Authorizing Agency (RAA).
- Prior to deployment and utilization, requests must be approved by the appropriate RAA. The RAA varies by circumstance:
    - DHMH shall serve as the RAA for HPP-purchased resources.
    - The Baltimore Regional UASI coordinator or his/her representative shall serve as the RAA for UASI-purchased resources.

Figure 1: Request Process Flow Chart



- For in-house HPP assets only, the MFO may utilize their assets without receiving DHMH approval. However, the assets continue to be reserved for emergency use only. Following use of in-house HPP assets, the facility is required to:
    - Notify DHMH within 24 hours of asset utilization. Notify DHMH via email at MDHPP.dhmh@Mayland.gov or call 410-767-8826; and
    - Submit an incident After Accident Report within sixty (60) days of asset utilization.

ii. Movement of Resources

- The RFO is responsible for coordinating the transportation of materials both to and from the MFO.
- If requested by the RFO, the MFO may assist in deployment of the asset to the RFO, but the RFO may be asked to reimburse any transportation/delivery costs incurred by the MFO consistent with the Regional Healthcare MOU.
- If there is a known or imminent threat, resources may be pre-positioned in coordination with the potential RFOs, but resource tracking documentation as detailed in Section IV.b.ii shall be maintained.

- At the completion of a resource deployment or upon direction the RAA that approved the equipment release, the RFO must return the resource to the MFO. However, if the assets are being deployed to a secondary RFO, that secondary RFO is responsible for transportation from the facility of the primary RFO.

iii. Resource Utilization

- Resources will only be used in a manner consistent with all federal, state, and local laws and regulations.
- The MFO, once an asset has been deployed to an RFO, is not liable for use or misuse of resources resulting in injury or death so long as the equipment has been properly maintained by the MFO as reflected in the Annual Resource Tracking Report for each asset.
- At the time of deployment, the RFO may request, and the MFO should provide, the most current Annual Resource Tracking Report to ensure that all equipment has been properly maintained prior to utilization.
- Resources may be utilized for an indefinite amount of time, unless or until:
    - They are recalled for redeployment to another facility in greater need.
    - The RAA rescinds the authorization of asset utilization.

iv. Resource Demobilization

- The RFO is responsible for returning all equipment and unused supplies to the MFO in a condition comparable to its state when the resource was requested.
- The RFO will ensure that the MFO is available to safely receive the asset before it is returned.
- The MFO will make all reasonable accommodations to receive the returned resources in a timely fashion.

- The MFO will verify that equipment is in a condition consistent with when it was lent. It will cite any changes in the condition of the resource on the Annual Resource Report.

v. Resource Reimbursement

- The RFO is responsible for returning and restoring any utilized asset to a comparable condition to when it was utilized. This includes, but is not limited to:
    - Refueling;
    - Restocking supplies;
    - Repairing any damage incurred by utilization; and
    - Replacing any lost, stolen, or missing resources or parts as identified in the Resource Summary Sheets (Section V).
- The RFO will replace any supply or restore any equipment as rapidly as possible.
- In the case of maintenance for equipment, the RFO may financially reimburse the MFO for the necessary maintenance, if the MFO maintains the equipment's standard maintenance contracts.
- If the replacement period for any supply or equipment is to exceed ninety (90) days after demobilization, the RFO will submit, in writing, a formal rationale for the delay and suggest a reasonable timeline for completion of the process.

V. Resource Forms and Information

a. Unified Resource Listing

Asset	MFO	Primary POC	Address	Grant/Funding Source	Size (if applicable)	Resource Code
Asset Description	*(Basic descriptor of controlling party and county location)*	*(POC of Asset)*	*(Location of Asset)*		*(Dimensions for transport)*	*(For R3 Form)*
16' x 24' Tent	Anne Arundel Medical Center	Patty Sherman (443-481-1297)	2001 Medical Pkwy Annapolis, MD 21401	HPP	Open: 16' x 24' Stored: 53'' x 53'' x 53'' Weight (lbs): 246	Tent-AAMC-16x24
16' x 24' Tent	Bon Secours	Jocelyn Pope (410-362-3609)	2000 W. Baltimore St. Baltimore, MD 21223	HPP	Open: 16' x 24' Stored: 53'' x 53'' x 53'' Weight (lbs): 246	Tent-BonSec-16x24

Medical Ambulance Bus & Fixed EWRAP - Howard County	UASI
Howard County Fire & Rescue Medical Ambulance Bus 13 2010 Thomas / Sartin This medical bus has been installed with a Fixed EWRAP. The item can be deployed with the vehicle, but is not removable.	1 (quantity) 2011 (Expiration, if App)
Request Code	MAB-HOCO-13

Request Process

Howard County Fire & Rescue	Howard County Fire Station 8 (Bethany Station) 9601 Old Frederick Road (Route 99) Ellicott City, MD 21042
Jimmy Brothers (Primary Point of Contact)	410-313-0649, jbrothers@howardcountymd.gov (Contact Information - phone, fax, and/or e-mail)

Request Process

See Appendix B – Medical Ambulance Bus Staffing and Deployment Plan.

Requests for non-emergent response from Maryland designated mutual aid fire/EMS jurisdiction: should be coordinated as far in advance as possible; handled through the Bureau of Emergency Services, EMS Operations for the respective Department.

Reimbursement requirements for the requesting party may apply in either emergent or non-emergent response scenarios but generally for emergent response UASI funds, FEMA reimbursement, etc. would be applied as eligible and as available. For non-emergent response requests, invoicing to the requesting party will be issued by the respective fire department responsible for managing the asset requested. Non-emergent response requests typically extend beyond the scope of fire department SOP's for standby coverage. Agreements with regard to covering expenses incurred for events of this nature must be made prior to the event taking place.

Requests for emergent regional or state response by any non-mutual aid Department or facility: made through MEMA; MEMA will notify local OEM of request to get approval for use; local OEM is responsible for insuring that BUAWG is made aware of the request. MEMA is responsible to also insure that MIEMSS Operations Chief of Field Operations is aware of the request.

Item Footprint and Storage Dimensions:

Length: 41 feet 4 inches
W: 8 feet
Height: 11 feet 4 inches

Resupply, Replacement, and Usage Stipulations:

Notes:

Staffed by crew of Engine 8, Medic 8 (if in quarters)

Region III ACS and Training Facility	HPP/UASI
Item description: On a day-to-day operation, the ACS is used as a conference room, training center and storage area. The site is used by GBMC and Region III Health and Medical Task Force to store emergency preparedness supplies, including: beds, communication devices, medical supplies, and HAZMAT equipment. When not activated, the ACS is typically used as training and meeting room. Most commonly it is used for defensive tactics training by the security department, Crisis Prevention and Intervention for Health System courses (CPIH), and meetings of the Baltimore County Emergency Management Task Force. To that extent, the ACS is equipped with large screen monitors, audio and video equipment, tables, chairs, training gear, such as striking pads and mats, and computers. The facility is self-contained and has four bathroom/shower areas, a kitchen area, and storage rooms. The facility also has a separate conference room which can be utilized as an office or as a command center when the site is activated for any emergency. During inactive times the site is monitored by a closed circuit camera system and is secured by a lock and key mechanism.	1 (Quantity) (Date Purchased) n/a (Expiration, if App)
Resource Code	RIIIACS

Request Process	
GBMC (Controlling Agency/Entity)	GBMC (Storage Location)
Michelle Tauson (Primary Point of Contact)	410-688-1151 mtauson@gbmc.org

GBMC shall:
1. Maintain keys available for prospective operators of the ACS to ensure that the facility can be accessed 24 hours a day, 7 days a week, 365 days a year. Access will be provided to requesting facilities or institutions upon successful notification as defined in Notification of ACS Activation Standard Operating Procedure (SOP).
2. Retain sole discretionary authority to reassume control of the South Campus Gymnasium should circumstances require.
3. Provide electrical and water resources to the ACS facility, as available, for safe and effective operation.

Item Footprint and Storage Dimensions:

Approx. 4,000 square feet

Resupply, Replacement, and Usage Stipulations: Requesting Hospital, EOC, or DHMH

Upon requesting activation, the requestor assumes the following responsibilities and expectations pursuant to operation of the ACS.
1. The requesting organization is required to fulfill the expectations set forth in all SOPs pursuant to operation of the ACS.
2. The ACS shall be operated utilizing the Hospital Incident Command System (HICS) model, including use of required forms, policies and procedures to ensure continuity of operations.
3. The requestor is solely responsible for ensuring that the facility is restored to GBMC in a comparable condition to that of their arrival. This shall include:
a. Providing appropriate custodial services to clean the ACS upon withdrawal;
b. Removing all waste, particularly biological, from the facility following demobilization
c. Replenishing any non-renewable resources received from GBMC or other Region III providers (i.e., generator fuel);
d. Maintaining internal site security for the duration of its operation and ensuring the return of facility access to an approved GBMC representative.
4. The requestor will maintain constant communications with GBMC, Region III hospital partners, local EOCs, DHMH and MIEMSS.
5. The requestor is solely responsible for medical care of patients treated in the ACS. This includes, but is not limited to, financial costs incurred, reimbursement requests, and malpractice liability. This may also require that the requestor develop strategies for:
a. Performing point-of-care laboratory testing for common tests and utilizing private or other facility resources for advanced laboratory testing;
b. Establishing decontamination guidelines for radiological, chemical or biological exposed patients arriving at the ACS; and/or
c. Maintaining the internal site physical security to protect patients.
6. The requestor shall operate the ACS in accordance with federal, state, and local laws governing medical treatment, particularly HIPAA, EMTALA
7. If multiple requesting organizations are utilizing the facility simultaneously, they are each responsible for operation of their delineated spaces, patients and providers. Internal ACS transfers should follow a comparable procedure as governed by law between two independent facilities.
8. The requesting organization is responsible for providing the staffing and resources associated with operating the ACS with the following exceptions:
a. Support requested and provided through active local EOCs.
b. Resources provided from the Baltimore UASI ACS Inventory (see Appendix C – Region III USAR Warehouse: ACS Activation Deployment Plan).
c. Staff made available from approved request through the Maryland MRC or MDDF.

c. Non-Deployable Assets and Ongoing Projects

Alternate Care Site Fiber Cable (NON-DEPLOYABLE ASSET)

Project Summary

Alternate Care Site received broad band internet and cable on April 7, 2016. Project complete.

Funding Stream: HPP

Web Fusion (NON-DEPLOYABLE ASSET)

Project Summary

To further enhance regional WebEOC capabilities, ESiWebFUSION was purchased through MEMA. This system acts as a central communication hub allowing multiple WebEOC servers and other third-party systems to correspond with one another during an event. The system accepts messages, stores them temporarily if necessary, and forwards the message on to the recipient. All data moving over ESiWebFUSION are fully encrypted in order to maintain the highest security.

The hospital remote board (located on the WebEOC network) allows users from external systems to view and post data. The ESiWebFUSION system will enhance the remote board feature by making a board instantly accessible to participating WebEOC servers. Data is also duplicated locally so critical information is not lost during network outages. All counties in Region III have access to the board.

As of December 2016, WebFUSION will be discontinued, as the new WebEOC system will have the needed communication capability previously provided by WebFUSION.

Funding Stream: HPP

Simulation Lab (NON-DEPLOYABLE ASSET)

Project Summary

Team performance during high-intensity situations is vital for trauma teams, who must be prepared to perform under extreme high workload conditions when resuscitating multiple severely injured patients. Trauma teams have used simulation training, yet existing emphasis and knowledge

has been on *single* patients. Experience in high volume trauma centers and current military deployments have shown the need for skills to treat multiple patients in short time periods. Development and evaluation of simulation-based training programs are needed for high performing trauma teams who are ready for extreme workload situations. The R Adams Cowley Shock Trauma Center's development of a National Traumatic Injury Simulation Facility is planned in partnership and coordination with the Center for the Sustainment of Trauma and Readiness Skills Baltimore. The training facility will enable simulation efforts will enable the R Adams Cowley Shock Trauma Center to expand to multiple patient scenarios in support of direct AF physician, nurse and medic training in this vital skill set. In addition, it will create a platform that supports the continued assessment of the role of simulation in the training of high performance trauma teams. This approach can be extended to the simulation training of civilian physicians, nurses, and emergency medical technicians as an essential part of the national emergency preparedness infrastructure. The modernization of the existing Center for the Sustainment of Trauma and Readiness Skills simulation program currently underway is designed to enable a complete relocation of that program into the National Training Center upon its completion.

The National Training Simulation Center is designed to provide training to all provider levels, both military and civilian. Emergency medical services personnel and other health care partners are included in the National Training Simulation Center. All partners will be able to access the National Training Simulation Center. For further information, contact Oliver "Jason" Bates, Training & Program Simulation Manager, obates@umm.edu.

Funding Stream: UASI

Region III Alternate Care Site Standard Operating Procedure (PLAN)

Project Summary

CHHS worked with the Regional III Health and Medical Task Force and Greater Baltimore Medical Center in development of guidance and standard operating procedures (SOPs) for opening a regional alternate care site (ACS) for a medical surge event. The existing plan utilizes available gymnasium space located on the campus of the Greater Baltimore Medical Center, but the principles considered in the ACS SOPs and standards of care research are portable to other facilities in Region III.

The deliverables also included a survey the current federal and state laws which may impact operation of the site and research on standards and practices utilized in other approved alternate care sites nationally.

Deliverables

Greater Baltimore Medical Center ACS Best Practices Final Version 10-31-2011
ACS SOP FINAL
Prescription Drug Refills during a Disaster (Memo)
Memo – State Laws re ACS and Medical Emergencies
Future SOP Development Considerations FINAL
Greater Baltimore Medical Center Legal Handbook Final Version 10-31-2011
Staging Personnel and Equipment FINAL
Regional Coordination Center FINAL
Mass Fatality Management FINAL

Project Completion Date: October 2011, updated in June 2013

Funding Stream: HPP

Region III Alternate Care Site Security Protocol (PLAN)

Project Summary

Masada Tactical, LLC partnered with the Region III Health and Medical Task Force to conduct a risk assessment of the Greater Baltimore Medical Center ACS facility and develop security protocols for use in conjunction with the SOPs during an emergency-driven activation.

Deliverables

Region III ACS and Training Center at Greater Baltimore Medical Center: Security Protocols

Project Completion Date: May 2012

Funding Stream: HPP

Medical Ambulance Bus Plugs (NON-DEPLOYABLE ASSET)

Project Summary

The Mobile Ambulance Buses (MAB) has, in a short time, been established as a very valuable asset to Region III. Unfortunately, along with their benefits there are also major costs associated with running this equipment, especially while idling at hospitals for extended periods of time. The MAB are required to run either their engine or generator to power equipment and care for on-board patients. This causes a large waste of energy as well as excessive noise in an already stressful environment.

Region III requested funds to install a hard-wired power drop (60 amps) at Region III acute care facilities. This plug is designed to be operable for multiple uses. Both the MABs as well as Mobile Incident Command Units will now have the ability to power equipment during extended operations alleviating the need have to run motors and/ or generators for extensive periods of time. This project also has the potential to power additional equipment such as inflatable tents, portable generators, and any other piece of equipment with a similar sized plug. Project complete.

Deployment Status (as of September 2016):

Participating Facilities	Vendor/Status	Quote Received
Franklin Square Hospital Center	**Already Installed**	
Howard County General Hospital	**Already Installed**	
Greater Baltimore Medical Center	**Already Installed**

Strategic Plan Development (PLAN)

Project Summary

The Region III Health and Medical Coalition is working to build a sustainable coalition through the development of a Strategic Plan, and Region III has also put a focus on building upon the goals accomplished previously. Region III has been working with CHHS and Witt O'Brien to build on accomplishments from previous years and move into the implementation phase. The development of an action organizational review and the development of strategic plan/bylaws with selected vendors are in progress. These activities served as a great foundation for the Coalition, but there are still several Coalition building stages to be completed by the Coalition before it is formalized. Region III is in the process of determining the best coalition model (501c3/501c6 etc) for incorporation. In addition, the Coalition continues to sustain and develop Coalition-building activities from previous Budget Periods. Upon completion, all deliverables will be uploaded to the Coalition website.

Funding Stream: HPP

Information Sharing/Communications Plan (PLAN)

Project Summary

The Region III Health and Medical Coalition Communications Plan supports the Coalition's mission to maintain communication and coordination with all partner organizations and entities through the deployment, training, and testing of a comprehensive and redundant communications system inside Region III.

The intended audience of this plan includes: Annapolis, Anne Arundel County, Baltimore City, Baltimore County, Carroll County, Harford County, and Howard County Health Officers, Public Health Emergency Planners, and communication liaisons within local health departments, hospitals, state facilities, Federally Qualified Health Centers and other health care providers within Maryland. The Communications Plan is a tool to assist in managing regionally deployed communications platforms and assets while maintaining tactical communications with regional and state partners during daily and emergency operations.

The goal of the Communications Plan is to support Region III by designing and implementing communication strategies and resources that provide partners with multi-modal, redundant communications platforms; provide guidance, direction, and support to regional partners in the use of communications platforms during normal and emergency operations; provide guidance on the effective use of each communications platform to ensure accuracy and timeliness of information

shared; and, evaluate the effectiveness of communication training, testing and utilization in order to continually improve upon previous strategies.

Medical Surge/Crisis Standards of Care (PLAN)

Project Summary

Region III continues to work on understanding current development of national guidance on catastrophic disaster response planning that will address guidance for crisis standards of care implementation processes, review existing Maryland laws that support healthcare and emergency medical services agencies during emergencies that will aid in the establishment of legal protections for healthcare practitioners and institutions. Region III is working with Witt O'Brien to develop a Medical Surge plan as well as a Crisis Standards of Care Framework from best practices and the framework developed to advance region planning in Maryland. The final Medical Surge Plan and Crisis Standards of Care Framework will be posted to the Coalition website upon completion.

Funding Stream: HPP

Evacuation Guidance (PLAN)

Project Summary

In 2006, the Maryland Region III Health and Medical Coalition was created in order to increase regional collaboration between local and state government agencies and regional healthcare facilities in the area of emergency preparedness and response.

On August 6, 2013, the Maryland Region III Health and Medical Coalition Evacuation Subcommittee conducted a workshop to identify evacuation planning gaps with its constituency (e.g. 21-hospitals, 6-jurisdicitonal agencies and the various state agencies). The workshop produced the "Gaps and Associated Recommendations to Expedite Hospital-Wide Evacuation" report. In addition, the Maryland Region III Health and Medical Coalition Hospital Evacuation Toolkit was developed to provide planning assistance and to assist hospitals in refining and augmenting their efforts to prepare for the possible evacuation of part or all of their facilities.

The Maryland Region III Health and Medical Coalition Regional Evacuation Guidance builds upon this previous work by providing Region III members and partners guidance in coordinating and executing evacuation policies regionally

and in individual hospitals. The plan details specific procedures and communications that can be used in a single or multiple facility evacuation, and the roles and responsibilities of the hospitals, government agencies, and other partners in such an event.

Funding Stream: HPP

Allocation of Scarce Resources (PLAN)

Project Summary

During a large-scale disaster, the existing healthcare systems within the affected area are unable to care for patients without altering the standard of care, due to the overwhelming demand and the lack of available medical resources for a period of time. In the course of a catastrophic event, despite efforts to strengthen medical surge capacity and capabilities, usual standards of care cannot be maintained and there may not be enough medical resources, making those resources scarce for all who need them. There is limited amount of guidance available, regarding how those scarce resources should be allocated during a crisis but relatively little of that guidance takes into account the values of the communities in which those decisions would be implemented.

The Allocation of Scarce Resource Project Team endeavored to foster the development of disaster response coalitions among healthcare institutions and government agencies and to promote public trust in response planning through transparent public dialogue. In order to accomplish this, the project team completed a five-year public engagement project in the state of Maryland. The early phases of the engagement process included a series of community forums to engage citizens across Maryland. The forums were held separately for both lay persons and medical, healthcare, and emergency responders and planners. There were two pilot sessions, six community forums, and seven healthcare provider forums. In both series of community forums there was dialogue about ethical principles and the citizen's personal values regarding what they considered most important in determining how to make decisions with regard to allocating scarce life-saving medical resources during a catastrophic event. After completion of the forums, the project team compiled and summarized the entire amount of data gathered from all the forums. Once the data was compiled, the project team consulted with subject matter experts in order to develop recommendations for the State of Maryland to support policymakers and healthcare providers decision making process related to the allocation of scarce medical resources during the time of a disaster is consistent with the values of the communities in which those decisions would be made.

In conclusion, the methods used by the Allocation of Scare Resources Project Team provide an effective and replicable process for engagement around

challenging health policy issues. The project team's experiences demonstrate that a wide variety of Maryland citizens can and will engage in extended civil discourse with their peers and experts, which would allow them to explore challenging topics in a way that would provide an opportunity to develop more informed and deliberative responses. Although many opinions shared by Maryland's citizens were consistent with national guidance, this project revealed key areas in which the values of Maryland citizens may significantly differ from the work of subject matter experts. These differences suggest areas for further exploration as well as thoughtful communication on the part of decision-makers.

A report titled "Community Values and the Allocation of Scarce Medical Resources in Disasters – A Public Engagement Project – Final Report" was completed on August 21, 2015 for DHMH and the Coalition to summarize the work of the project team. Finally, the project team is awaiting final approval from DHMH and the Coalition to develop the state-wide decision framework to allocate scarce resources.

Funding Stream: HPP

Fork Lift Charger (NON-DEPLOYABLE ASSET)

Project Summary

The Fork Lift Charger was delivered to the contractor's warehouse on August 13, 2013 and was installed at the Urban Search and Rescue Warehouse, under the direction of Stephen Karas.

Triage Tags

Project Summary

In addition to the current allotment of triage tags found at many of the healthcare facilities and within the Region III Cache, MIEMSS made a large statewide purchase of newly marked triage tags for dissemination to partners throughout the state of Maryland, including Region III.

See Appendix J – Region III BP2 Procurement Request Master Summary for dissemination of triage tags.

Project Completion Date: July 2013

Funding Stream: HPP

VOIP Phones (NON-DEPLOYABLE ASSET)

Project Summary

Voice over IP (VOIP) phones were purchased to enhance regional interoperable communications between healthcare and emergency response partners in Region III. VOIP will allow health care providers to route voice conversations over the Public Safety Intranet, thus providing a redundant voice communication system that does not rely upon publicly accessed telephone networks.

See Appendix H – VOIP Phone Directory for a complete list of current VOIP contacts.

Funding Stream: UASI

VI. Plan Maintenance

- The terms, grant provisions, legal requirements, and planning assumptions will be modified as necessary, no less than once every three (3) years.
- Resource sheets and appendices will be updated as changes are recognized, but will be reviewed by a member facility on rotating basis no less than once a year to verify accuracy of contact sheets and resources.
- Following deployments, any issues of tracking, transfer, resource management, or resource reimbursement/replenishment shall be noted by the involved parties and proposed corrective action proposed in writing to the Chair of the Region III Health and Medical Coalition.

Appendix B – Medical Ambulance Bus Staffing and Deployment Plan

Howard County Department of Fire and Rescue Services

GENERAL ORDER

GENERAL ORDER 320.09

Medical Ambulance Bus Staffing and Deployment

EMERGENCY SERVICES BUREAU

Issue Date: 7/19/2013

Revision Date:

APPLICABILITY

All personnel

POLICY

The Howard County Department of Fire and Rescue Services (HCDFRS) has a Medical Ambulance Bus (MAB), designated as MAB-13. The following provides a brief overview of the regional MAB program, as well as the staffing and deployment plans for the unit assigned to Howard County.

DEFINITIONS

PROCEDURES

General Overview

The Region III Health and Medical Task Force (Task Force) was created in 2006 to establish regional cooperation and collaboration between local, state, federal government agencies and regional healthcare partners in the area of emergency preparedness and response. The Task Force has obtained federal funding to purchase regional Medical Ambulance Buses, along with supplies and equipment to provide medical response capabilities for the entire region. Funds for these purchases were made available through the Baltimore Urban Area Security Initiative (UASI) and the Maryland Department of Health & Mental Hygiene (DHMH) Hospital Preparedness Program (HPP) grant programs.

There are two Medical Ambulance Buses within Region III; MAB-13 and its sister MAB assigned to the Anne Arundel County Fire Department. These units are specialized regional assets that may be requested to support a variety of incident types within their respective jurisdictions or throughout the state of Maryland. These incidents may include, but are not limited to, mass casualty incidents, evacuations, medical rehab on large scale incidents, alternate care site support, medical surge events, or as a medical treatment area for a large scale planned event. Each Medical Ambulance Bus is designed to manage various patient configurations that include up to 12 back boarded patients, 24 seated patients, 8 wheelchair patients, or various combination of patients based on the incident needs. While the Medical Ambulance Bus's primary function is to care for Basic Life Support patients, it is also equipped to manage Advanced Life Support patients if Advanced Life Support providers are available.

MEDICAL AMBULANCE BUS MANAGEMENT

The Bureau Chief of the Bureau Emergency Services or designee shall be responsible for the overall management of the Medical Ambulance Bus.

The Career Captain assigned to the Bethany Station shall be responsible for the day-to-day coordination of programs necessary to maintain personnel training and unit response readiness.

The response of the Medical Ambulance Bus shall include the following response team members:

- Operators (Driver)
- Officers (Lieutenant or above)
- Technicians (Emergency Medical Technician or above)

QUALIFICATIONS FOR RESPONSE TEAM MEMBERS

- Operators
  - State of Maryland Class B Commercial Driver's License (CDL)
  - Successful completion of the Medical Ambulance Bus Drivers Training Manual (see **Attachment A**)

- Officers
  - Currently serving at the rank of Lieutenant or above
  - Successfully complete the Medical Ambulance Bus Skills Checklist
  - Approved by the Career Station Captain assigned to the Bethany station
  - Approved by the Bureau Chief of Emergency Services or designee

- Technicians
  - Successfully complete the MAB Skills Checklist
  - Approved by the Career Station Captain assigned to the Bethany station

All training records for those approved to respond on the Medical Ambulance Bus shall be maintained by the Bureau of Education & Training.

The Career Station Captain assigned to the Bethany station shall be responsible for maintaining an updated list of individuals qualified to operate as a response team member. This updated list shall be provided to the Bureau Chief of Emergency Services, or designee, on the first work day of each month. The list of qualified personnel shall also be provided to the field Battalion Chief Office's for daily field staffing requirements.

TRAINING

In-service training shall be conducted, at a minimum, on a monthly basis for all qualified personnel. Training topics shall include, but not be limited to, General Order 330.01 (Mass Casualty Incidents), Medical Monitoring for Rehab Operations and other topics necessary to support Medical Ambulance Bus potential responses.

In-service orientation & familiarization training for all field operational personnel shall be provided by the Bureau of Education & Training on an annual basis.

Documentation of all training shall be maintained by the Bureau of Education & Training.

REQUESTS FOR EMERGENCY & NON-EMERGENCY RESPONSES

Emergency response requests made by jurisdictions within the Baltimore-Washington Region shall be coordinated through the Howard County Public Safety Answering Point. When responding, the Officer in Charge shall have "Howard" notify MIEMSS of the unit's response.

Requests for emergency responses outside the Baltimore-Washington region shall be made by the requesting department or agency to the Maryland Emergency Management Agency (MEMA). MEMA will notify and request approval from the Howard County Office of Emergency Management (OEM) for the Medical Ambulance Bus response. The Office of Emergency Management shall coordinate with the Bureau Chief of Emergency Services or designee. The Office of Emergency Management shall be responsible for ensuring that the Baltimore Urban Area Work Group is made aware of the request. MEMA is responsible to ensure that the Maryland Institute of Emergency Medical Services Systems (MIEMSS) Chief of Field Operations is aware of the request.

Non-emergency requests should be made as far in advance as possible by the requesting department. Approval for the use of the Medical Ambulance Bus for non-emergency requests shall be at the discretion of the Bureau Chief of Emergency Services. Staffing of the unit for non- emergency events or the use of the Medical Ambulance Bus for any other purpose shall be coordinated through the Bureau of Emergency Services.

EMERGENCY RESPONSE STAFFING

Staff assigned to the Bethany Station shall deploy the Medical Ambulance Bus with a minimum of 3 qualified personnel that shall include an Operator, Officer and Technician.

The utility vehicle assigned to the Bethany Station shall also respond with one qualified person to provide operational and logistical support to the Medical Ambulance Bus.

In addition to staffing provided from the Bethany Station, a Medical Duty Officer or officer at the rank of Captain or above shall respond to the incident to provide management support to the Incident Commander.

INCIDENT RESPONSE TYPING

The Medical Ambulance Bus may be requested for any incident at the discretion of the Incident Commander. Consideration for response should be given during times of extreme temperatures for the sheltering of citizens or personnel.

Deputy Chief John S. Butler Operations Command

Appendix C – Region III USAR Warehouse: ACS Activation Deployment Plan

Region III Maryland Alternate Care Site Equipment and Supply Cache Activation Plan

The Region III Alternate Care Site (ACS) Equipment Cache is stored in the Baltimore City Fire Department Urban Search and Rescue (USAR) warehouse located at 4220 Shannon Drive Suite A-D, Baltimore MD 21213. The following plan outlines the process for activation, deployment and return of cache equipment and supplies.

Activation

All requests for cache activation and deployment are to be made by contacting the local Office of Emergency Management (OEM) that serves the requesting jurisdiction. An OEM directory is attached. Each respective OEM will verify cache activation through the Baltimore City Mayor's Office of Emergency Management. Baltimore City then requests deployment through the Baltimore Urban Area Security Initiative (UASI) Chairman or alternate designee. Requesting hospitals and health departments should **not attempt** to contact the UASI Chairman nor the designated alternate directly.

In effort to sustain inventory controls, requests for activation will trigger an HC Standard alert to determine a) if activation of a jurisdiction specific or region wide MOU has occurred, b) if existing resources have been or are available to be shared as a result of the MOU activation, c) if other resources, included but not limited to those identified in the Region III Resource Management Plan have been activated.

Deployment

If the USAR team is available, they have the equipment and personnel to transport the ACS equipment cache to a requested location. This should be considered the best method to have the ACS equipment cache moved. If the USAR team is deployed and therefore unavailable, each requesting hospital and / or local health department will be responsible for loading and transporting their requested cache portion to the desired location. In addition, if the USAR team is deployed the warehouse forklift is also deployed with the team. An additional forklift has been purchased for the warehouse to eliminate barriers to cache access by other Region III partners.

The warehouse address listed above can be entered into any Global Positioning System for additional directions on getting to the facility. Site features include multiple loading docks on the front, side and rear of the building. All drivers should report to dock #4 to obtain cache assets. A site map with loading docks is attached.

In addition, a directory of vehicle fleets for all Region III hospitals and health departments is updated annually and attached to this plan. A dock height 24' box truck with a lift gate is recommended for transporting the cache in the most efficient manner. For reference, cache assets are stored in Ropak containers measuring 40 X 42 X 48. While other type vehicles may be used, additional cache breakdown would be required to create smaller loads for transport by smaller vehicles. The requesting hospital or health department is ultimately responsible for breaking down the cache into appropriate sizes for safe transport.

All partners are strongly encouraged to have their own pallet jack equipment for unloading the cache upon return to their respective facilities. Two additional pallet jacks are available upon request and will be provided on a first come first serve basis provided there is no demand for this resource at the USAR warehouse itself.

All drivers should be accompanied by at least one other adult capable of assisting in the loading process. Any hospital or health department representative that has successfully completed the forklift operator training detailed below should be part of the above recommended two-person minimum for reporting to the warehouse.

The loading phase requires use of licensed forklift operators to pull and load storage containers on box trucks. A directory of licensed operators may be found in Attachment D. USAR division leaders will manage operator recertification costs as applicable.

Requests for additional forklift support beyond the licensed operators identified in this plan must be made via the local OEM's who will negotiate additional support as needed. The names and affiliation of personnel not pre-identified in this plan must be forwarded to Baltimore City OEM prior to their arrival at the warehouse.

USAR Warehouse Access

For security reasons spare keys and door alarm codes are not distributed and / or disclosed. Hospitals and health departments must make requests for warehouse access through their local OEM. An OEM directory is attached.

Each local OEM will be responsible to convey requests for warehouse access through the Baltimore City OEM. Baltimore City OEM maintains an active directory listing of individuals that can unlock the warehouse facility. Hospitals and health departments **should not attempt** to contact the warehouse directly to request access.

Inventory Management

As stated above, the Baltimore City OEM controls access to the warehouse and will generally be present to provide such access during activation. If the situation permits the Baltimore City OEM representative will also assume the role of warehouse logistics manage to help stage the cache for deployment. However, the requesting facility must appoint an Inventory Manager who will

be responsible for loading and tracking all supplies transported, used and returned and should be prepared to identify this individual upon request for cache activation. In the event USAR sends the supplies on behalf of the requesting partner, the facility making the supply request must send a designee to assume the Inventory Manager role. USAR team members only serve as a transportation resource *if available* and do not assume an Inventory Manager role specific to the ACS cache.

The Inventory Manager will complete an inventory management form which has been created to track ACS cache equipment and supplies. A copy of the form is attached to this plan. The Inventory Manager must sign out all ACS cache equipment and supplies before leaving the warehouse. All equipment and unused supplies must be returned to the warehouse within 30 days. In addition all used supplies will be replenished by the requesting partner within 30 days. Once again the Inventory Manager must sign in when returning cache assets.

Warehouse Safety

Safety and efficiency must be given priority when the ACS cache is activated. Please note the following when accessing the USAR warehouse:

Drivers should report to the warehouse with at least one other adult capable of assisting with loading and unloading.

A forklift is mandatory in removing ACS equipment from storage shelving and positioning equipment for loading. Attempts to remove equipment via other methods are not permitted. Only trained forklift operators may operate the forklift. Attempts by untrained operators are strictly prohibited. Other lifting tools such as pallet jacks will be used at the discretion of the warehouse manager.

It is recommended that all cache assets be transported in a dock height 24’ box truck with lift gate. While other vehicles may be used all drivers must understand the maximum load capacity before leaving warehouse grounds. Do not attempt to load vehicles beyond maximum capacity.

Drivers may not leave the grounds until they have signed out all outgoing equipment and signed in all returned equipment.

Do not attempt to break in to the warehouse. Access procedures outlined above must be followed.

In the event of warehouse related accidents and / or injuries, workers comp related claims are the sole responsibility of the hospital or health department of which the individual is employed.

Cache Maintenance

There are currently no operating budgets available to replace expired or depleted items in the cache. Replacement of expired cache equipment and supplies will continue to be supported

through federal UASI grants to the extent funding is available. In addition, forklift operator recertification costs will be evaluated on a three-year cycle.

All equipment and unused supplies must be returned to the warehouse within 30 days. In addition, all used supplies will be replenished by the requesting partner within 30 days.

Plan Maintenance

Applicable attachments such as vehicle fleet directories and licensed forklift operator directories should be reviewed and updated at least annually. Core content such as names of individuals and their contact information should also be updated at least annually.

REGION III HOSPITALS	Vehicle Type	Fit Pallet? Y/N	Comments	Lift gate	Lease	Fork lift/Pallet jack
Columns Defined		**Can you fit pallet in vehicles listed?**		**Do vehicles listed have a lift gate?**	**Ability to lease a 24' box truck with lift gate, if needed?**	**Any pallet jacks or fork lifts on site?**
Anne Arundel Medical Center	2 pickups and 1 van	Yes(1)	Van is cargo. 1 pickup is full-size; the other is a small bed.	No	No	Yes; pallet jacks
Baltimore Washington Medical Center (Univ. of Maryland)	4 dr jeep					
	Chevy Silverado p/u					
	8x12 open top trailer that can be towed by p/u	Yes	Also have 2-Boc trailers- currently storing hazmat materials, these could be emptied and utilized to move supplies	No	No	Yes, pallet jack
Bon Secours Baltimore	3 multi-passenger vans					
	4 mini vans					
	3 p/u trucks			Yes		
	3 passenger vehicles/cars		5 passengers each			
	1 school bus					
	5 SUVs		7 passengers each			
	5 transportation buses		12 passengers each	Yes		
	1 dump truck					
	2 trailers	Yes	p/u trucks and trailers will hold pallets.	Yes		Yes, one pallet jack
Carroll Hospital	1 Pick up	Yes(1)				
	1 Envoy	No				
	1 Escape	No				
	Carmate Trailer (2)	No	One for hazmat and one surge supplies	No	Yes	Yes, pallet jack
GBMC	2 SUVs	No				

	2 3/4 ton pick up	Yes		No	No	
	4WD ATV	No				
	Multiple Pallet Jacks and 1 fork lift					Yes
Hopkins Bayview	1 ton box truck 40'	Yes		No	No	
	1 cargo van	Yes	multiple assets within system that support materials management and supply chain systems.	No	Yes	Yes
Hopkins Hospital	multiple assets in fleet	Yes	At Hopkins, we have the appropriate vehicles within our system that support our supply chain departments.	Yes	Yes	Yes
Howard County General	1 ton stake body truck 2 - 3/4 ton pick-ups	Yes	Also have relationship with Apple Ford for additional assets.	No	No	No
University Maryland Medical Center Midtown Campus	1 4x4 pickup truck	Yes (1)	Bed would hold one pallet	No	Yes	Yes
	2 AWD mini vans	Yes(1)	Seats could be removed from vans to hold a single pallet if necessary	No		Yes
	2 large SUV	No		No		Yes
	2 4x4 jeeps	No		No		Yes, pallet jack
MedStar Franklin Square	2 pickup trucks	Yes	Can also request support from corporate office	Yes	No	Yes
	2 SUV's	No				
	1 dump truck	Yes				
	2 box trucks	Yes		Yes		
MedStar Good Samaritan	3 Transportation Buses	No	Passenger	No	Yes	1 Fork Lift
	3 Vans	No	Passenger	No		1 Power Pallet Jack
	4 Pickup Trucks	Yes	Cargo	No		3 Manual Pallet Jacks
	1 Box Truck	Yes	Cargo	Yes		
	1 Trailer	Yes	Cargo	No		
	1 Dump Truck	Yes	Can also request	No		

			support from corporate office			
MedStar Harbor Hospital	4 pickup trucks	Yes		No	Yes	Yes, pallet jack
	1 van (mini)	No	holds up to 5 fair amount of carry area in rear	No		
	3 SUV's	Yes	5 passengers each very little room in storage area	No	Yes	
MedStar Union Memorial	5 – 4X4s SUVs	No		No	No	No
	2 pickup trucks that can each hold one pallet	Yes	No box truck	No	No	Yes, pallet jack
Mercy Medical Center	2 4X4 SUVs	No		No	No	Yes, pallet jack
Northwest Hospital	3 pick ups	Yes		No	No	Yes, pallet jack
Sheppard Pratt	7 buses					
	35 vans/pickups between all locations	Yes		No	Yes	Yes to both
Sinai Hospital	5 Mini Van	N	5 Passenger	no	no	yes to both
	1 Accessible Van	N	1 Wheelchair location	no	no	
	2 Cargo Vans	Y	Cargo van	no	no	
	1 Dump Truck	N	Dump Truck	no	no	
	1 Bus	N	21 Passenger Bus no Wheelchair Lift	no	no	
	28 Bus	N	12 Passenger with 2 Wheelchair Locations	no	no	
	3 Bus	N	10 Passenger with 3 Wheelchair Locations	no	no	
	1 Bus	N	14 Passenger with 2 Wheelchair Locations	no	no	
	9 Passenger Vehicles	N	4 Passenger Vehicles	no	no	
	4 SUV's	N	4 Passenger Vehicles	no	no	
	1 Cube Truck	Y	Cube Cargo Van	yes	no	
	1 Refridgerator Truck	Y	Refridgerator Truck	yes	no	
	1 Box Truck	Y	Cargo Height Box Truck	yes	no	

	4 4WD SUV's	N	4WD SUV Passenger Vehicles	no	no	
	4 Pick-Up Trucks	Y	Pick-Up Trucks	yes	no	
Spring Grove Hospital Center	5 15-passenger vans	N	max ambulatory: 12, no wheelchair, no bed-bound, no forensic, no hydraulic lift, License Class C	N		
	8 12-passenger vans	N	max ambulatory: 10, no wheelchair, no bed-bound, no hydraulic lift, License Class C	N		
	2 standard vans	N	forensic: 14, no hydraulic lift, License Class C	N		
	1 handicap bus	N	min ambulatory: 17, max ambulatory: 20, wheelchair: 1, no bed-bound, no forensic, no hydraulic lift, License Class CDL	N		
	1 non-handicap bus	N	max ambulatory: 30, no wheelchair, no bed-bound, no forensic, no hydraulic lift, License Class CDL	N		
	2 2-row SUVs	N	max ambulatory: 3, no wheelchair, no bed-bound, forensic: 2, no hydraulic lift, License Class C	N

	1 12ft box truck	Y	max ambulatory: 0, no wheelchair, no bed-bound, no forensic, no hydraulic lift, License Class C	N		
	2 lift gates	Y	hydraulic lift	N		
	1 8ft stake body	Y	max ambulatory: 0, no wheelchair, no bed-bound, no forensic, no hydraulic lift, License Class C	N		
	4 half ton extended cab	Y	min ambulatory: 0, max ambulatory: 0, no wheelchair, no bed-bound, no forensic, no hydraulic lift, License Class C	N		
	8 half ton standard cab	Y	min ambulatory: 0, max ambulatory: 0, no wheelchair, no bed-bound, no forensic, no hydraulic lift, License Class C	N		
	2 quarter ton standard cab	Y	min ambulatory: 0, max ambulatory: 0, no wheelchair, no bed-bound, no forensic, no hydraulic lift, License Class C	N		
	5 sedans	N	min ambulatory: 2, max ambulatory: 3, no wheelchair, no bed-bound, no forensic, no hydraulic lift, License Class C	N		
	1 used ambulances	N	min ambulatory: 1, max ambulatory: 2, no wheelchair, bed-bound: 1, no forensic, no hydraulic lift, License Class C	N	Y	Y - 2 pallet j./one fork

St Agnes Hospital	1 Pick-up truck					
	1 Toyota RAV4					
St. Joseph Medical Center (Univ. of Maryland)	1 3/4 ton pick up	Yes		No	No	Yes, Pallet Jack
	1 mini van	No		No	Yes	
	1 SUV	No		No	Yes	
	1 Cargo Van	No		No	Yes	
University of Maryland Medical Center	1 F250 pickup with lift gate	Yes				
	1 econoline van	Yes				
	2 minivans		Other passenger only vehicles - not available	Yes on F250	Yes	Yes
Upper Chesapeake Health (Univ. of Maryland)	2 Ford Escape SUVs	No	1 at UCMC, 1 at HMH	No		
	2 Ford F-150 Pickups	Yes	1 at UCMC, 1 at HMH	No		
	3 Ford E-150 cargo vans	Yes	1 at UCMC, 1 at Swan Creek Community Outreach office (Havre de Grace), 1 at HMH	1 Yes, 1 No		
	1 Freightliner RV	No	Located at Swan Creek Community Outreach office - Set up as mobile clinic vehicle	No		
	1 F550 12' Box Truck	Yes	Located at Riverside warehouse	Yes		
	1 28' Box Truck	Yes	Located at HMH	Yes		
Local Health Departments	**Vehicle Type**	**Fit Pallet? Y/N**	**Comments**	**Lift gate**	**Lease**	**Fork lift/Pallet Jack**
Columns Defined		**Can you fit pallet in vehicles listed?**		**Do vehicles listed have a lift gate?**	**Ability to lease a 24' box truck with lift gate, if needed?**	**Any pallet jacks or fork lifts on site?**
Anne Arundel County	2 - Four-wheel drive vehicles	No		No	Yes	Yes, 1 Pallet Jack and 1 pallet lift stacker
	1 – Van	No		No		

	4 - Trucks (of the four: 1 Four-wheel drive, 3 open-bed trucks)	No	Also, have MOU with County Library system to use box trucks.	No	Yes	Yes, 1 Pallet Jack and 1 pallet lift stacker
	38 - sedans	No		No		
Baltimore City	1 box truck with lift gate	Yes		Yes		2 pallet jacks off site
	2 vans	No		No		
	1 small pick-up truck	No		No		
	1 compact car	No		No		
Baltimore County	HHS motor pool	No	HHS has a small fleet of sedans used by other health divisions; (1) 16-passenger van; 3 cargo vans; NOTE that all motorpool vehicles are typically unavailable due to other assignments—emergency use only. Schools have box trucks w/lift gates that we utilize during PODs	No	Yes	No
	1 GMC 4x4 covered pickup w/10' trailer	No	PHEP leases from County (owned)	No	yes	PHEP: 2 jacks & 2 stackers; County has forklifts available during an emergency
	1 10' box truck w/lift gate but is a State DSS asset	Yes	PHEP has pallet stacker and 2 pallet jacks at PHEP warehouse; DSS has pallet jack and pallet stacker at DSS warehouse/DGC with loading dock, DHR box truck with lift gate at Drumcastle (state asset), DPW has fleet of	Yes	No	DSS has 1 jack & 1 stacker; these are state assets

			box trucks with lift gates and forklifts			
Carroll County	Ford E-350 Super Duty Box Truck	Yes	Box Dimensions: 6’ 8” H X 7’ 8” W X 14’ 6” D;	No/ N/A	Likely Availability Dependent	Yes, 1-PJ & 1-FL
Harford County	26' box truck with lift gate	Yes		Yes	No	No
Howard County	1 Sprinter van, 25 Sedans and SUVs, 1 RV, and 6 6’x12’ trailers with capacity of 7,000 lbs.	No	We also have access to county vehicles, which contain box trucks, and truck with a lift gate	No	Yes	2 pallet jacks. County has fork lifts, if needed.
Other Agencies	**Vehicle Type**	**Fit Pallet? Y/N**	**Comments**	**Lift gate**	**Lease**	**Fork lift/Pallet Jack**

Appendix F – Responsibilities by Agency or Organization

This appendix is a brief summary of core responsibilities of each described party in this Region III Resource Management Plan. It is not intended to act as a surrogate for the CONOPS section, but rather a brief primer for explaining the plan to appropriate parties. For more detailed information, consult the CONOPS (Section IV) of the plan.

Requesting Facility/Organization (RFO)

The RFO has several responsibilities:

1. Identify Grant Source through which a desired asset was purchased.
2. Provide both verbal and written requests for assets (R3 Form) to the appropriate RAA based on grant type and the MFO. This requires an appropriate rationale and may only come from the Hospital Incident Commander (or equivalent) or his/her designee. See Figure 1 on following page for detailed description.
3. Transport all requested assets to and from their facility/organization.
4. Store, maintain, secure, and safely utilize assets that they receive.
5. Maintain appropriate records utilizing the Region III Asset Utilization Form and return those forms to the MFO after the cessation of a deployment.

Maintaining Facility/Organization (MFO)

The MFO has three (3) core responsibilities:

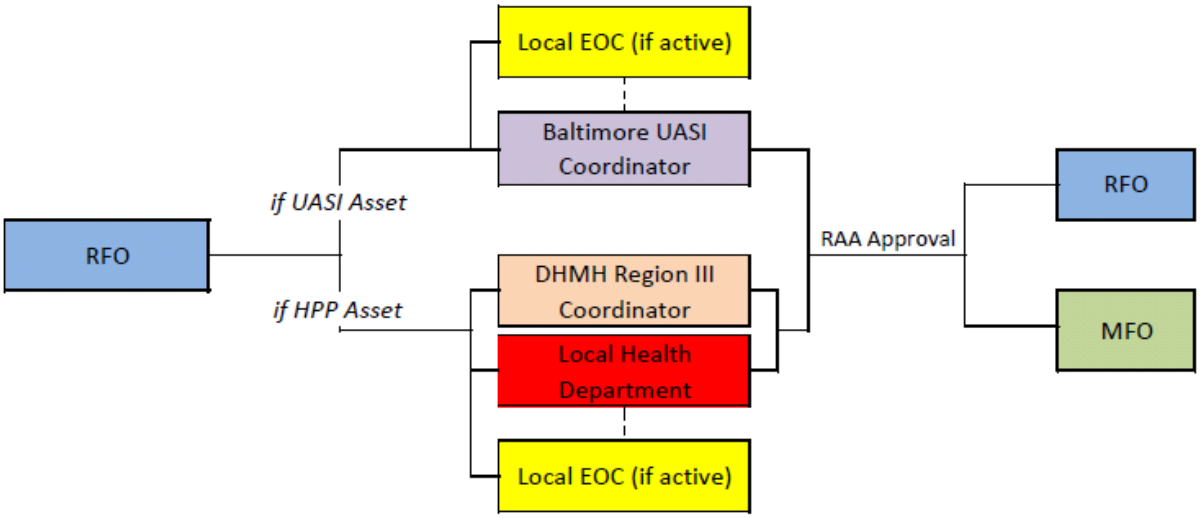
1. Storing, maintaining, and securing all regionally purchased assets under their control.
2. Maintaining appropriate records of maintenance and utilization as well as up-to-date points of contact and locations for each asset. This includes:
    a. Verifying condition upon the return of a resource from a deployment;
    b. Providing up-to-date records to the RFO at the time of deployment; and,
    c. Reporting annually to the grant-funded agency that purchased the equipment.
3. Making a request resource available in a timely manner after its deployment has been approved by the appropriate RAA.

In addition to those core capabilities, MFOs may also, if reasonable and requested by the RFO, assist in transport of resources to and from the RFO.

Request Authorizing Authority (RAA)

The RAA has three (3) core responsibilities:

1. Receiving Regional Resource Request (R3) Forms from RFOs.
2. Verifying and approving the eligibility of the resource request based upon the grant funding stream requirements within a timely fashion.
3. Relaying the approval or denial of a resource request to the RFO and, if approved, the MFO for the requested resource(s).
4. While the RAA for an asset may vary based upon the grant through which the asset was purchased, it is incumbent upon the RAA to ensure that they are communicating with local EOCs (if active) in the RFO and MFO's jurisdictions to encourage appropriate situational awareness and ensure a more effective response



Appendix G – Terms and Acronyms

- **ACS –** Alternate Care Site
- **ASPR –** Assistant Secretary for Preparedness and Response
- **CFR –** Code of Federal Regulations
- **CHHS –** Center for Health and Homeland Security
- **CONOPS –** Concept of Operations
- **DHMH –** Maryland Department of Health & Mental Hygiene
- **DHS –** Department of Homeland Security
- **EMRC** – Emergency Medical Resource Center is the communication and information center that has access to the FRED network. The EMRC is operational 24 hours a day. The EMRC does not have any decision-making or supervisory authority.
- **EMS** – Emergency Medical Service
- **EOC** – Emergency Operations Center – the location established to coordinate all aspects of a disaster response
- **FEMA** – Federal Emergency Management Agency
- **FRED** – Facilities Resources Emergency Database is the communication system used by hospitals, healthcare facilities, health departments and state agencies to communicate during an emergency to collect and disseminate information. It is activated according to FRED guidelines.
- **HHS** – Department of Health and Human Services
- **HICS** – Hospital Incident Command System
- **HPP** – Hospital Preparedness Program
- **ICS** – Incident Command System
- **MAB** – Mobile Ambulance Bus
- **MEDICAL DISASTER** – an incident that exceeds a healthcare facility's effective response capability or cannot appropriately be resolved solely by using its own resources.
- **MEMA** – Maryland Emergency Management Agency
- **MFO –** Maintaining Facility/Organization is the facility or entity that routinely stores, maintains, and protects regionally acquired assets prior to their deployment and after completion of their use.
- **MIEMSS –** Maryland Institute of Emergency Medical Services
- **MMRS** – Metropolitan Medical Response System
- **MOU** – Memorandum of Understanding

- **OEM** – Office of Emergency Management
- **RAA –** Request Authorizing Authority is the agency or party ultimately responsible for deploying regional resources. The RAA may vary depending upon circumstance. When city or local EOCs are active, they serve as the conduit for ALL resource requests.
- **RFO** – Requesting Facility/Organization is the healthcare facility or agency that is directly impacted by an emergency that requires the use of regional assets through the Resource Management Plan.
- **RMP** – resource management plan
- **SNS** – Strategic National Stockpile is a collection of nationally purchased, regionally deployed assets available through request to DHMH under a state Declaration of Emergency.
- **SOP** – Standard Operating Procedures
- **UASI** – Urban Area Security Initiative
- **USAR** – Urban Search and Rescue
- **VOIP** – Voice over Internet Protocol
