

Supply Station™

Pre-Treatment Water Storage

The Supply Station™ is an open top tank available in 3,000 gallon and 300 gallon capacities. Constructed of heavy-duty 14 gage steel tubing and 22 oz. pvc, it is rugged enough for any environment. The innovative, patented frame design enables the Supply Station™ to fold into a compact footprint for easy storage in a standard closet.

The Supply Station™ enables water sources like fire trucks and construction tankers to supply a facility or location with a significant amount of source water prior to purification by an FW-60™ or FW-720™. Dual 10" drain spouts and conveniently positioned floor handles make tear down and movement easy.

Specifications	
Frame	7/8" od. 14 gage steel
Sidewalls	22 oz. pvc
Floor	30 oz. pvc
Drain	10" tube x 2
Size (S.S. 3,000)	13' x 13' x 29" open 7' x 15" x 29" closed
